Halt, and ultimately reverse, the current overdraft and provide for sustainable management of surface and groundwater
 Increase the water supply reliability, enhance operational flexibility, and reduce system constraints
 Improve and protect water quality
 Provide additional flood protection
 Protect and enhance aquatic ecosystems and wildlife habitat
 Increase amount of groundwater in storage with intent to eliminate the groundwater overdraft in 20 years
 Identify opportunities and Projects
 Identify DAC priority needs and promote/support solutions to DAC water issues
 Increase average annual supply and reduce demand
 Increase dry year supply
 Increase regional conveyance capacity
 Compile baseline water quality data for ground & surface water
 Encourage Best Management Practices, policies & education that protect water quality
 Identify sources of water quality problems & promote/support solutions to improve water quality
 Increase surface storage
 Sustain the Kings River Fisheries Management Program
 Pursue opportunities to incorporate habitat benefits into projects
 Increase public awareness of IRWM Efforts
 Involve local water districts and land use agencies in generating and confirming the current and future water needs to ensure compatibility and consistency with land use and water supply plans
 Comply with SBx7-7
 Pursue opportunities to include project elements that reduce energy consumption, reduce greenhouse gas emissions, use renewable resources or include carbon sequestration strategies
